Sarah Chen
Email: sarah.chen@example.com | LinkedIn: linkedin.com/in/sarahchen-ds | Portfolio: sarahchen.dev
Location: New York, NY

PROFESSIONAL SUMMARY
Applied Data Scientist with 3+ years of experience designing and deploying machine learning pipelines, predictive modeling

CORE COMPETENCIES & TECHNICAL SKILLS
- Programming: Python, SQL, R, Bash
- ML Libraries: Scikit-Learn, XGBoost, LightGBM, Pandas, NumPy, SciPy, Statsmodels
- Tooling: Jupyter, Docker, MLflow, Airflow, Git, PostgreSQL
- Data Science Skills: Feature Scaling, Data Leakage Prevention, Imbalanced Classification, Hyperparameter Optimization,

PROFESSIONAL EXPERIENCE
Data Scientist | QuantEdge Analytics (2023 - Present)
- Engineered end-to-end scikit-learn pipelines with custom transformers and cross-validation for customer churn prediction,
- Prevented data leakage across 15+ production pipelines by strictly isolating preprocessor fits to training splits.
- Conducted randomized search hyperparameter tuning over ensemble gradient boosted trees, cutting model inference late

Associate Data Analyst | BlueSky Metrics (2021 - 2023)
- Implemented robust outlier detection and missing value imputation strategies across multi-million-row financial datasets.
- Built interactive monitoring dashboards tracking precision-recall decay and data drift metrics.

EDUCATION
B.S. in Statistics & Data Science | Columbia University (2017 - 2021)
