Location: San Francisco, CA

PROFESSIONAL SUMMARY
Machine Learning Engineer with 2+ years of experience specializing in deep learning, training pipeline optimization, and neu

CORE SKILLS & TECHNOLOGIES
- Languages: Python, C++, SQL, Bash
- Frameworks & Libraries: PyTorch, TensorFlow, Scikit-Learn, NumPy, Pandas, HuggingFace
- Tools & Infrastructure: Docker, Git, Linux, CUDA, MLflow, Weights & Biases
- ML Competencies: Supervised Learning, Stochastic Gradient Descent, Loss Optimization, Overfitting & Regularization (L1

PROFESSIONAL EXPERIENCE
Machine Learning Engineer | Apex AI Labs (2024 - Present)
- Designed and benchmarked custom mini-batch training loops in PyTorch, reducing per-epoch iteration time by 28% across
- Implemented adaptive learning rate schedulers and gradient clipping to stabilize training for high-variance loss surfaces.
- Integrated automated evaluation metrics (ROC-AUC, Precision-Recall, F1) into continuous deployment pipelines.

Junior ML Developer | Synapse Data (2023 - 2024)
- Developed decision tree and gradient boosted ensembles (XGBoost, Random Forest) for tabular classification benchmark
- Mitigated model overfitting using L2 weight decay and dropout, improving out-of-sample generalization accuracy by 6.2%.
- Cleaned and prepared high-dimensional feature datasets, utilizing PCA for dimensionality reduction.

EDUCATION
B.S. in Computer Science (Specialization in Artificial Intelligence) | University of California, Berkeley (2019 - 2023)
